ELOA - UNIQUE LIGHTS art objects for your home

Light objects float weightlessly in space. Fragile, iridescent, timeless. Solitary, or in constellation, ELOA lamps create individual light concepts that remind us of star constellations. Hence the objects' names.

ELOA combines the craft of ancient glassblowing with a simple, yet distinct design. To achieve the large size of the glass objects while working without forms requires a high level of refined craftsmanship and skill, which can only be performed by a few master glassblowers in Bohemia. These objects exist as pendant, floor, standing, and wall luminaries as well as bowls and vases.

ELOA was founded in 2015 by designer Simone Lüling in Berlin. Studio and showroom are located at Reinbeckhallen in Berlin. Historically characterized as Electric-City by AEG (iconic german company in electrical engineering) and nowadays a well-established artist's district, the area stands for the fusion of art and technology. Like ELOA.

HAUMEA AMORPH

HAUMEA AMORPH is an elliptical asteroid with a crystalline surface. ELOA's HAUMEA is topped with the clear brilliance of crystal. This brilliance then blends down softly into gradients of milky color, which can seem wonderfully polar or soothingly warm depending on its orientation within your gaze. Its shape is quiet, balanced, peaceful, and harmonious, helping it to become one with the room while grounding the space. The integrity of the blown glass gives it the flexibility of looking beautiful anywhere, whether used as a table piece or as a pendant lamp.

HAUMEA AMORPH

ELOA's HAUMEA AMORPH is topped with the clear brilliance of crystal. This brilliance then blends down softly into gradients of milky color, which can seem wonderfully polar or soothingly warm. Used as a table lamp HAUMEA's amorphous shape is peacefully grounding its surrounding space.

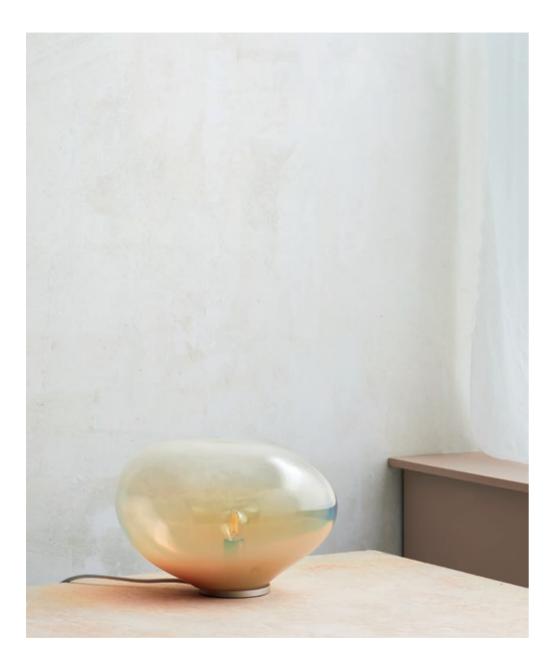

SIRIUS

Sirius is the most visible star in the sky. SIRIUS combines the liveliness of light with the beauty of organically rounded horizontal shapes – bringing a majestic feeling of levitation into your space. It sparkles, suspended from the ceiling, with its pleasingly irregular form creating an impression of quiet movement throughout the room. Its iridescent amber hues contain all the colors of the light spectrum – giving out a warm glow and surrounding you with a cozy cocoon of calm.

SEDNA

ELOA's SEDNA is shaped naturally amorph, balanced, peaceful, and harmonious, helping it to become one with the room while levitating in the space. The brilliance of crystal blends down softly into gradients of color, which can seem wonderful soothingly and balancing. The integrity of the blown glass gives it the flexibility of looking beautiful anywhere, whether used as a table piece or as a pendant lamp.

DWARF PLANET

DWARF PLANET lamps emit a soft light into your space, their appealingly rounded forms reflecting the individualistic irregularities of the celestial bodies after which they are named. These handmade lamps are available in many colors and are flexible enough to be used in many different ways to suit your particular lighting needs. They can invoke the presence of the universe, whether positioned high in the room or near the floor, and will add a sumptuous atmosphere to your surroundings.

CERES

CERES is the largest object in the asteroid belt and at the same time the smallest celestial body classified as a dwarf planet. In the same way, the CERES pendant lamp looks strong and radiant and at the same time fragile and delicate. Originally, the name stands for fertility. With its feminine shape and fine curves, CERES is the most feminine glass lamp in our collection and bathes any ambience in a soft light.

LYRA

ELOA's amorphous shaped LYRA gracefully floats in space. Its form emerges in an endless variety of poetic shapes depending on its orientation within your gaze. The elegant appearance follows the star constellation lyra. LYRA's extruded form opens up space for a wide spectrum of colors. The smooth color transition in Yellow Green Blue creates a very calming moment. The bright color notes Flamingo, Coral and White Opaque provide fresh and radiant accents of color.

PLANETOIDS

Planetoids are small asymmetrical objects that float delicately in space. Combine their various forms and colors to custom-design the celestial ambience of your room. PLANETOIDS are available as individuals or in trios, quartets, quintets, etcetera, etcetera, etcetera - creating infinite variations of your own, personal constellations.

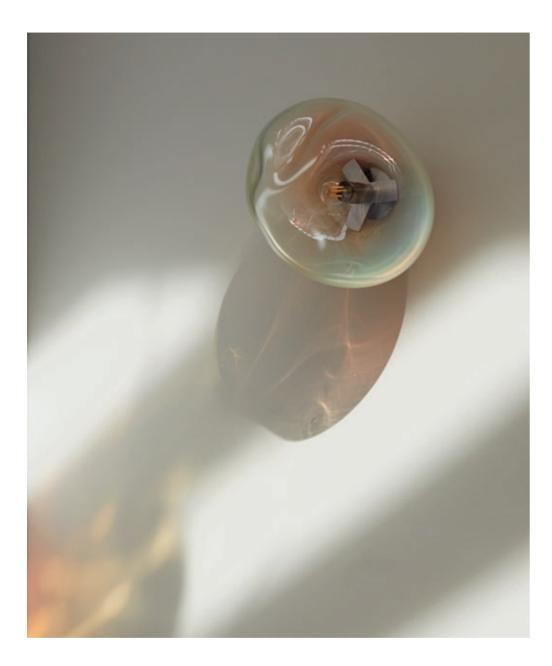

CEILING LAMP

ELOA's subtle ceiling lamps are perfectly suitable for spaces with lower ceiling heights. The close connection to the ceiling creates a smooth circular gradient of light, embodying stars high up in the sky. Each glass color radiates in its unique tone and creates a specific atmosphere.

WALL LAMP

ELOA's elegant wall lights shimmer like precious raindrops dripping off a surface. The mouthblown glass bubbles highlight the space with their brilliance and unique forms. The warm circular shine creates astonishing color gradients on the wall. The freedom to choose between various shapes and colors opens up the opportunity to compose magnificent constellations.

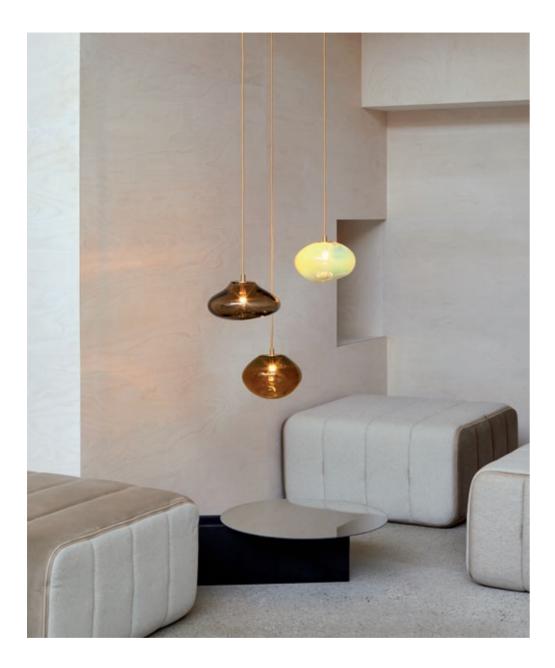

CONSTELLATION

Floating like colorful soap bubbles - ELOA's pendant lamps are available in various shapes and colors. This poetic and sensual CONSTELLATION of unique glass shapes and hues is reminiscent of hovering soap bubbles, radiating calm and elegance. These extraordinary pendant lamps are simultaneously art installation and functional design. During the day they enchant with the intensity and transparence of their colors. At night, the warmth of their light is a wonderful invitation to relax after a busy day.

STARGLOW

Shimmering and glittering like twinkling stars, STARGLOW combines ELOA's smallest glass pendant lamps into a cloud of sparkling reflections. STARGLOW appears as a configuration, with 3, 6, 10 or more pendant lamps. And STARGLOW's impressions can be intensified all the more by simply increasing the number of elements. Due to its delicate size and Mini LED technology, STARGLOW can be used in many areas of the home to impressive effect. Whether in the lounge area or at the dining table, STARGLOW captivates with its airy and glimmering presence by way of its unique colors and myriad of possible lighting effects.

STATIX

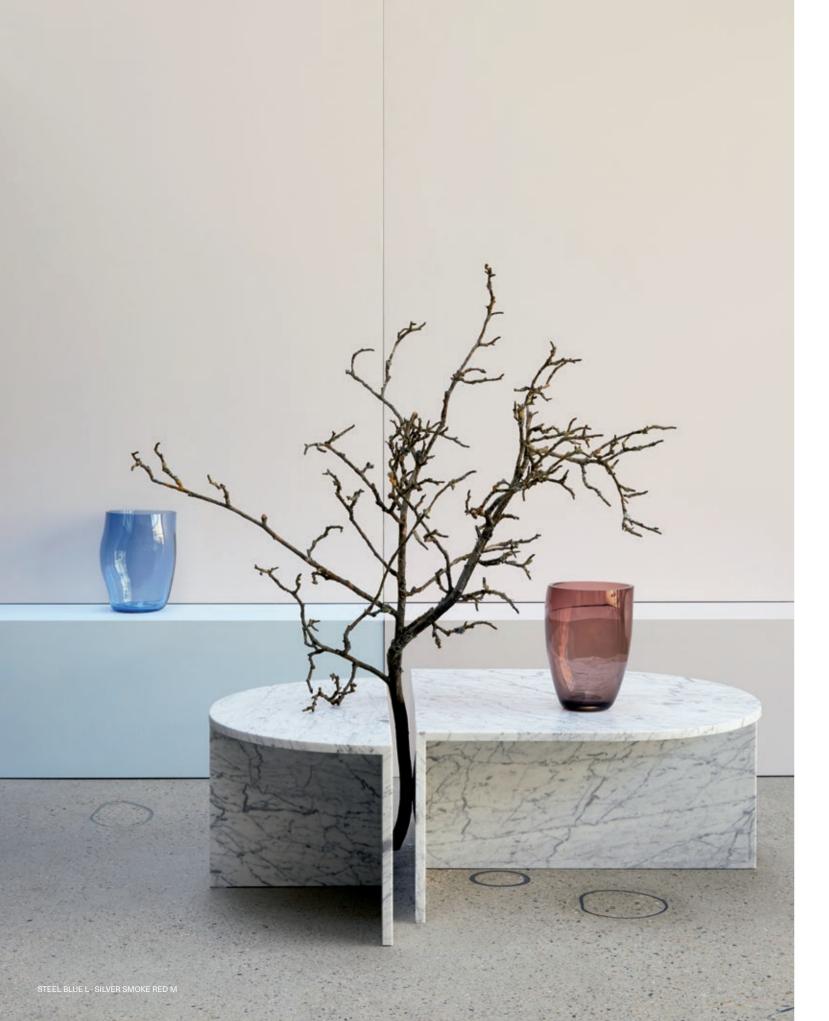

Inspired by the stars in design and name, STATIX combines function with a uniquely eccentric style. With its handmade wooden tripod base, featuring finely crafted metal fixings, it carries us off in much the way that a telescope would - showing us a sky of endless possibilities. With this hand-blown lamp, you can easily adjust its brightness of mood to your preference. STATIX comes in two color variations. The Amber Iridescent version, with its exclusive hand-blown bulb, brings the glow of a sunset into the realm of your personal living space. In Silver Smoke, this lamp surrounds you with the quietly elegant serenity of moonlight. These heavenly beings have a presence all their own; stabilizing and illuminating.

SUPERNOVA IV

Supernova is a rare and magical visual phenomenon that manifests itself as a quick brightness. As exploding stars are the cause of this beauty in nature, SUPERNOVA's organic surface generates amorphous reflections. SUPERNOVA is a collection of vases and bowls that float in space and create unique compositions between nature and object.

SUPERNOVA II

ELOA's amorphous shaped vases, made of mouthblown glass, form a fluid unity with the flowers they are holding. Resembling flowing water motions, SUPERNOVA II appears to gracefully reach up towards the sky. The vases gleam with a high brilliance of color, just like brightend shooting stars. The elegant design of SUPERNOVA II with a wide opening is perfectly suitable for voluminous bouquets.

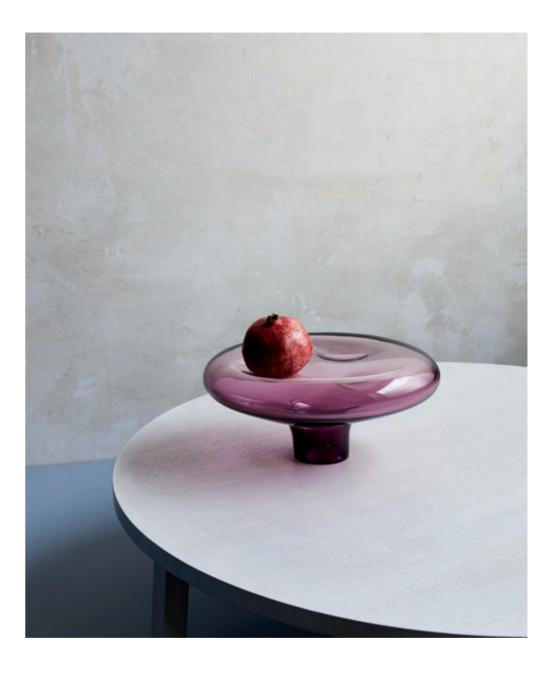

SUPERNOVA I

The organically shaped bowls of different sizes and forms offer multiple opportunities of poetic harmony. The iridescent amber contains all the colors of the spectrum and fascinates everyone, who comes in touch with it. The pure elegance of silver smoke creates a warm atmosphere and blends in every situation by gently grounding the space.

MAKEMAKE

Makemake is reminiscent of Jupiter's ring. It was designed with the double functionality of being a vase and a fruit bowl. In use, the majestic and artistic form is enhanced by the inserted flowers or fruit. The crater-like indentations give the blown glass a presence that dazzles the eye.

GLASS

We use high-quality glass. Irregularities may arise naturally, as this is a characteristic sign of mouth-blown glass.

DIMENSIONS

Dimensions may vary, as these objects are mouth-blown without wooden moulds. Each object is unique.

COLORS

The colors may also vary in gradation, as each basic color contains many variations within itself.

ILLUMINATION

The luminaries come with LED bulbs. E14 / 630 Lumen / 5 W = power of 50 W / dimmable Starglow: LED G4 / 210 Lumen / 2,1 W = power of 20 W / dimmable
